

SybizVision

Inventory Ledger

THE FAST AND USER-FRIENDLY ACCOUNTING SOLUTION

Improve your inventory management with a powerful stock control system that tightly integrates with other Sybiz Vision solutions. Stock information is automatically updated through sales, purchases and order placement. With Sybiz Vision's Inventory Ledger module, you are completely up-to-date and in control.

BENEFITS INCLUDE:

Inventory Management

Efficient inventory management can save thousands of dollars by reducing unprofitable stock lines and improving re-ordering procedures. The Sybiz Vision Inventory Ledger module provides a suite of customisable reports that give you an up-to-date picture of your sales and gross profit across multiple product lines.

Sale and Purchase Units

With the inventory module you can buy and sell inventory in different units. Perhaps you purchase by the box but sell individually or purchase by the barrel and sell by the litre? Whatever the mix, you can sell every item individually or in up to three other units of measure.

Kit Sales

Sell a predefined mix of products as a kit or pick a product and display the components. View the sale and cost price of the components and those of the combined kit product. This feature also enables you to track serial and batch numbers.

Multiple Price Levels

In addition to eight separate user-defined price scales, you can store an unlimited number of special prices or discount percentages for individual customers or groups of customers. This may be on a product by product basis, by product group or based on purchased quantities.

Details	Price & Units	BJ & Location	Display
Product Number: 1015	Selling Prices: Wholesale 300.00, Trade 250.00, Retail 400.00	Unit Costs per Each: Last Delivery 220.00

6000	Ceramic Gnome	1	QLD - Van 4 210299		0
3002	Garden Seats	1	TAS - Van 5		0
			VSM - Stock		0

Easy Stocktakes

You can perform your physical stocktake on the first day of the month then enter the figures over the course of the month while normal trading continues. You can enter data by part number or automatic sequence. You can perform rolling stocktakes by taking one location at a time or by splitting your inventory into sets of products.

Inventory Ledger

THE FAST AND USER-FRIENDLY ACCOUNTING SOLUTION

Serial Number/Lot Tracking

Sybiz Vision's Inventory Ledger module enables you to enter serial and lot (batch) numbers for products at their time of purchase and to track them. Use-by dates are also available.

The screenshot shows a software window titled "[1098] BMG Video Card". Below the title bar is a menu bar with options: "Move Down", "Show Details", "Edit", and "Show Available Serial Nos. Only". The main area contains a table with the following columns: "Serial Number", "Status", "Location", and "P...". The table lists several items, all with a status of "In stock".

Serial Number	Status	Location	P...
I_018	In stock	VSM - Stock	1 0
I_017	In stock	VSM - Stock	1 0
I_016	In stock	VSM - Stock	1 0
I_015	In stock	VSM - Stock	1 0
I_014	In stock	VSM - Stock	1 0
I_013	In stock	VSM - Stock	1 0
I_012	In stock	VSM - Stock	1 0
I_011	In stock	VSM - Stock	1 0
I_010	In stock	VSM - Stock	1 0
I_009	In stock	VSM - Stock	1 0
BMG_02	In stock	SA - Main	1 0
BMG_01	In stock	SA - Main	1 0

Multiple Locations

Maintaining stock in more than one physical location is a breeze with the Sybiz Vision Inventory Ledger. It's even flexible enough to use if you only have one physical location but want to separate stock that has been allocated to jobs or assemblies so it's not confused with your stock for sale.

Other Benefits

Other benefits of Sybiz Vision's Inventory Ledger module include:

- up to 25 character product codes
- up to 35 character product descriptions with extra information available for documents
- a non-diminishing stock option
- barcodes
- alternate part numbers
- bin locations
- three cost methods—average, FIFO or standard costing
- product groups
- decimal quantities
- re-ordering and stock ageing analysis
- photos of inventory items
- automated price list updates
- the ability to email product information to potential customers

System Requirements

The minimum requirements to run Sybiz Vision are:

- a computer with a CD-ROM drive, running Microsoft® Windows 98, Windows NT4 SP6, Windows 2000 or Windows XP Professional (please note, this software will not install on Microsoft Windows XP Home Edition or Microsoft Windows ME operating systems)
- 32 MB of RAM (128 MB recommended) and 256 screen colours at 800 x 600 pixels
- Pentium 400 MHz processor
- 250 MB hard disk space plus data
