

SybizVision

THE FAST AND USER-FRIENDLY ACCOUNTING SOLUTION

Sybiz Vision is the accounting solution that is fast, flexible and user-friendly. It extracts comprehensive reporting for fast growing companies and, with over 50 additional industry specific solutions, Sybiz Vision is the accounting solution for your business.

Sybiz Vision stands out in three distinct ways:

1. Easy to use, giving companies an edge to optimal productivity
2. Flexible enough to customise to your exact business requirements
3. Able to grow with your business through industry specific modules

BENEFITS INCLUDE:

Tailored and Integrated Business Tools

When you invest in your future with Sybiz Software, specialised, accurate and integrated business tools become available to you. Sybiz Software has a number of industry specific solutions that have been developed by Authorised Third Party Developers including solutions for payroll, point of sale, service companies, online stores, the clothing trade, importers, manufacturers and more.

Processing in Multiple Periods = Timely Information

Give your staff the ability to process in different accounting periods, even those in closed financial years. There's no need for your staff to stop working while the accountant finalises the current period or to sacrifice the timeliness of your information. Any changes will be reflected in your current reports.

Quick and Easy

Sybiz Vision makes full use of Microsoft Windows®, providing quick and easy access to a host of familiar features. This will have new or experienced staff up and running in no time, giving them time to focus on more important things in the business.

Customisable and Adaptable Structure

It's the small differences that make every organisation unique and Sybiz Vision's open database structure makes it easy to adapt the core product to suit your requirements. You can add custom fields to any of the database files including debtors, creditors, inventory, job costing and general ledger. You can also change the layouts for invoices, sales and purchase orders, quotes, statements, remittance advices and cheques. Whatever your requirements, Sybiz Vision has the flexibility you want in a business solution.

SybizVision

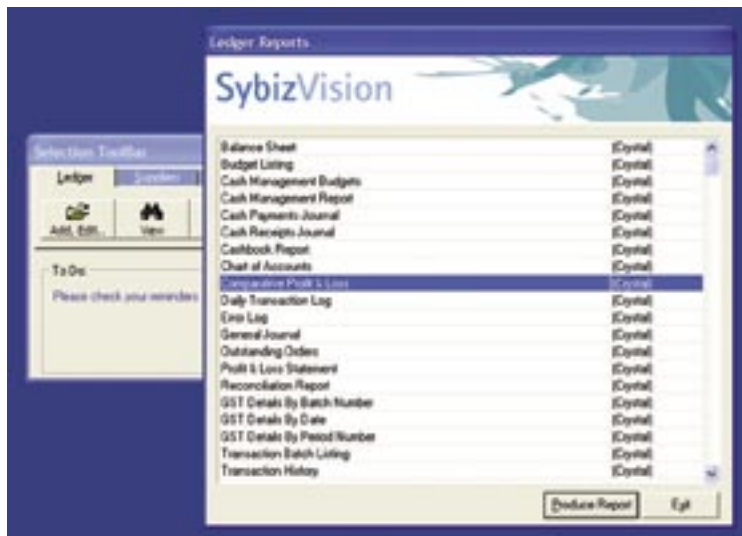

THE FAST AND USER-FRIENDLY ACCOUNTING SOLUTION

Multi-user Capabilities

Sybiz Vision can easily cater for over 50 concurrent users without compromising the performance of your business. Take advantage of Sybiz Vision's multi-user design which enables multiple users to access the system at one time. This is complemented by security and multi-tasking features that enable you to maintain confidentiality and control over your information.

Comprehensive Reporting

The Report Writer module enables you to customise and create standard reports and stationery layouts so you can monitor all facets of your business. Reports can also be produced with popular reporting tools such as Crystal Reports and Microsoft Access®. Specialised reports can be sourced through our network of Authorised Business Partners.

Sybiz Vision – The Solution

Sybiz Vision consists of the following modules:

- General Ledger
- Cash Book
- Accounts Receivable (Debtors)
- Accounts Payable (Creditors)
